On Tuesday, the students from 4J and 4R visited the Maribyrnong Wetlands—known as the Afton Street Sustainable Wetlands Park. At the park, we saw how various environments develop with access to rainwater and how that water is stored to sustain the nearby Maribyrnong River as well as plant and animal habitat environments so they survive. The children had a great time strolling around the wetlands park and gained a great deal of insight as to how we can look after our local environments.

Many thanks to all our parents who helped out on our excursion, and to Michael O for the fantastic photos!

Mr Romeo and Miss Jill (Year Four teachers)
