OVERVIEW

TERM 3

Art Form: Printing, Collage and Construction, Fibres and Textiles

Making and Creating

Level 1: Develop awareness of different types of paper. Develop skills in tearing, fringing and cutting. Make pictures and patterns by tearing and cutting shapes. Create 2D constructions with paper and recycled materials, using joining techniques including taping, gluing, cutting and folding.

Level 2: Create 3D pipe cleaner construction using magiclay. Paper can change by tearing, cutting, folding, crumpling and twisting. Picture making from varied patterns, colours and textures. Discuss how threads are made—spun, twisted, felted, plaited. Describe sensory perceptions—warm, slippery, thick, itchy.

Level 4: Printing—using the incised method of printmaking using polystyrene. Use monoprints to create backgrounds eg water, land, fire. Create multiple stencils to layer on an artwork. Stamp printing—select geometric objects and experiment to see how many marks can be made. Discuss way tools can give different types of lines in a monoprint.
